Maintenance

We do not simply install; we engineer, build and bring new ways to solve the challenges of today, by saving time, money and driving continuous improvement on any capital delivery, upgrade or maintenance programme.

Corporations, Utilities, Security and Traffic Authorities rely on control room solutions for situational awareness and the central information and decision-making hub.

We offer a comprehensive range of visual display and powerful processing technologies allowing information to be shared securely across your organisation, for faster decision making and increasing productivity. Our fundamental goal is to leverage on emerging high-performance visualisation technologies in line with existing systems and projected growth, to future proof your environment and get you the right information to the right place, at the right time.

Secure your Environment. Secure your Business.

Video Walls

With a variety of technology, size and resolutions, our range of versatile visual display solutions are designed for 24x7 operations.

- LCD Video Walls
- LED Video Walls
- Rear-projection Video Walls

Graphic Controllers

Combining individual outputs into a coherent desktop display, for a wide range of displayed network data, video and sources.

- Any display surface can be realised
- Wide range of input and output connections
- Can manage multiple video walls simultaneously

Control Room Software

Our range of software options allow for operation across platforms, different operating systems and large number of clients.

- Capture, display and share visual information
- Modular and web-based
- Open interface to 3rd party devices

Turnkey Solutions

Ergonomic & architectural design, engineering, installation and system integration, together with interior design and shopfitting through to commissioning, maintenance and service.
